

TOPFINISH 2

NANO REFINISHING POLISH

CUT

FINISH

Product description

This is a nano-abrasives based refinishing polish able to permanently remove swirls, polishing marks resulting from previous coarse compounds and holograms, which are more visible on dark colours. TOPFINISH 2, recently powered by our R&D department, is the best solution for the extreme refinishing action even of the most delicate and difficult surfaces. Thanks to its balanced and effective blend of nano-abrasives and high performance polishing agents, it allows to achieve the highest standard of perfection and brightness in a safe, simple and quick way.

HOW TO USE: Please apply by variable speed polisher, selecting a medium-soft foam pad TT04. Pour a small quantity of compound on the polisher-pad. Let the polisher turn at low revolutions, speeding them up (1000-2000 RPM) while spreading the paste with crossed movements. Pay attention at not overheating the surface. If necessary, please repeat the application more times. Eventually, wipe the surface with a clean cloth.

Physical properties

Colour: Light blue or Black

Physical form: Liquid-creamy

Odour: Light and pleasant

Explosion limit: None

Flammability: Not flammable

Stability: Tested after exposure to temperatures between - 15°C e + 45°C

IMPERFECTION LEVEL (HIGH 4 > LOW 1)
